

PRESS RELEASE

PEER Group recognized as a Great Place to Work®

KITCHENER, Ontario - April 28, 2008

The PEER Group Inc., an international supplier of factory automation software and services for the semiconductor, automotive, electronics and life sciences industries announced today that it is being recognized as one of this year's 50 Best Workplaces in Canada. This list, and related stories, will appear in a special national report on Monday April 28th, 2008 in the *Globe and Mail*.

PEER Group is committed to creating a great work environment—and that starts with the people. We all feel this, almost every day. From the creation of innovative solutions and support for our customers' success, to the outpouring of love and support for people we work with who are in need, it's clear that we work with a special group of people. In the end, that's what creates an amazing workplace—being surrounded by people you respect and care for. Of course, it doesn't hurt to work in a cool, loft-like setting with amazing coffee and on-site massage therapy!

This list of "Best Workplaces in Canada" is compiled by Great Place to Work® Institute Canada. The competition process is based on two criteria: two-thirds of the total score comes from a 57-statement survey completed by a random selection of employees, along with their open-ended comments about their organization; the remaining one-third of the score comes from an in-depth review of the organization's culture, including an evaluation of HR policies and procedures. This offers a rigorous representation of the organization from an employee perspective, and an overall portrait of the workplace culture. Together, they provide crucial data relative to the five trust-building dimensions of a great place to work: credibility, respect, fairness, pride, and camaraderie.

More than 24,000 employees participated in the 2008 "Best Workplaces in Canada" survey.

About PEER Group

PEER Group provides leading-edge factory automation software solutions and consulting services to advanced manufacturers and OEMs in the semiconductor, electronics, life sciences and automotive industries. Many of the world's best manufacturing companies turn to PEER Group to solve their most challenging equipment automation, data management and custom application development problems. PEER Group partners with leading software and automation companies to assure the most efficient delivery of highly functional, reliable and scalable solutions.
